

DE ARK

CONSTRUCTION 2015

CITY/COUNTRY

Oekene / Belgium

PRODUCT GROUP

canopy

PRODUCT

steel canopy

AREA

210m²

ARCHITECT

Architecten Groep III

CUSTOMER

Artes Depret

TECHNICAL DESCRIPTION

This seemingly simple awning only reveals its subtleties after closer inspection. Curved elements, complex steel decoration, subtle drainage and creative lighting all add to the character. The keen eyed visitor will notice that the structure is designed to resemble a whale.

CONTEXT

Oekene, in the municipal district of Roeselare, is one of the schools engaged in the "Schools of Tomorrow" initiative. The contemporary playful and modern design of this school, by Architects Group III, creates an environment where children can enjoy themselves.
